

## Esker Named to *Food Logistics*' 2018 FL100+ Top Software and Technology Providers

**Singapore — 18 December, 2018** — Esker, a worldwide leader in AI-driven [process automation solutions](#) and pioneer in [cloud computing](#), has been named a 2018 FL100+ Top Software and Technology Provider by *Food Logistics*, a publication dedicated to covering the movement of product through the global food supply chain.

The annual FL100+ Top Software and Technology Providers list serves as a resource guide of software and technology providers whose products and services are critical for companies in the global food and beverage supply chain.

“The digital supply chain continues its rapid emergence, bringing with it expanded capabilities that impact visibility, security, compliance and efficiency,” remarks Lara L. Sowinski, editorial director for *Food Logistics* and its sister publication, *Supply & Demand Chain Executive*. “Every aspect of the global food supply chain stands to benefit from new and innovative software and technology that is fundamentally changing the global food supply chain.”

As the food and beverage industry experiences consistent growth, ensuring there are back-office processes in place that are efficient, guarantee accurate data and encourage scalability is critical in keeping up with higher order-volume. Due to the short window of time available between placing the order and getting it through the supply chain before expiration, making sure that orders are processed accurately and timely is that much more critical. Esker’s Order Processing Automation solution can safeguard against the inefficiencies that come with manual data-entry. By automating redundant, time-consuming tasks, companies can improve order entry accuracy, reduce processing time, and free up CSRs to focus on higher-value tasks.

“Esker strives to keep improving year after year, and we are honored to be recognised yet again as a top technology provider for the food and beverage industry,” said Steve Smith, U.S. chief operating officer at Esker. “We understand the unique challenges that face this industry, and we are continuously looking for ways to streamline processes, cut costs and improve supplier relationships.”

Companies on this year’s 2018 FL100+ Top Software and Technology Providers list will be profiled in the November/December 2018 issue of *Food Logistics*, as well as online at [www.foodlogistics.com](http://www.foodlogistics.com).

## About Esker

Esker is a worldwide leader in cloud-based document process automation software, helping financial and customer service departments digitally transform their order-to-cash (O2C) and purchase-to-pay (P2P) cycles. Used by more than 6,000 companies worldwide, Esker's solutions incorporate technologies like artificial intelligence (AI) to drive increased productivity, enhanced visibility, reduced fraud risk, and improved collaboration with customers, suppliers and internally. Esker operates in North America, Latin America, Europe and Asia Pacific with global headquarters in Lyon, France, and U.S. headquarters in Madison, Wisconsin.
